- Title of the project : Inhibitor Screening from Marine Compounds for Trypanosoma Brucei Variant Surface Glycoprotein.
- Keywords : VSG Protein
- Introduction :
- Objectives : To find the potent inhibitor from marine compounds for trypanosoma brucei variant surface glycoprotein.
- Methodology :
 - Isolation and characterisation of compounds from marine sources.
 - Calculating Molecular descriptors and ADME property of the compounds.
 - Best find compounds selected for docking with VSG protein.
- Signature : P. Mumtaj
